Data Strategy

What it is and why every company should have one

Dr. Sven Thies

Open Online Data Meetup Vol. 2

Who I am

- PhD in Applied Statistics
- Data Scientist @ TraumFeWo
- AI Consultant @ PTSGroup

Sven Thies

Data is the new gold

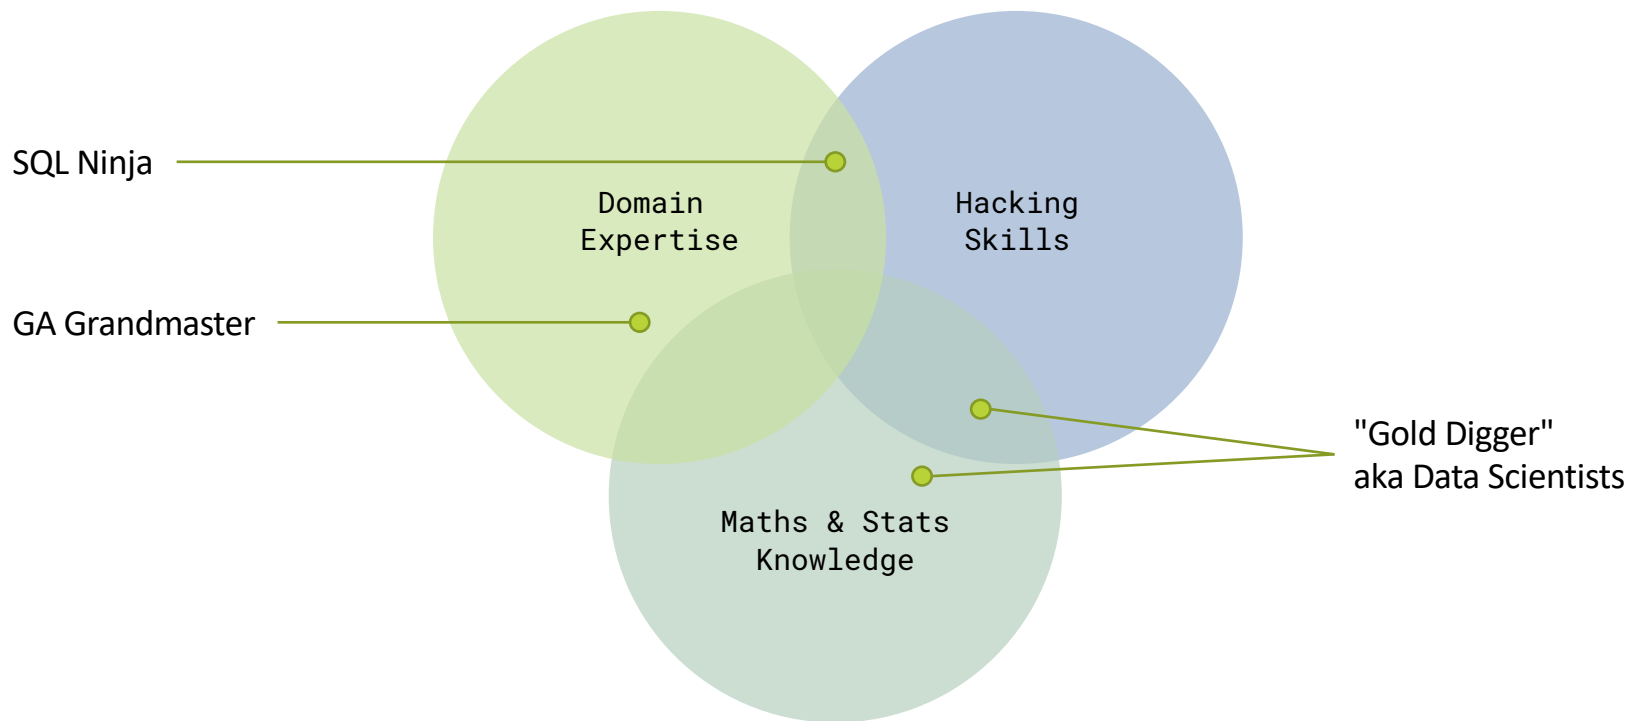

Build a team of “Gold Digger”

Existing Data People

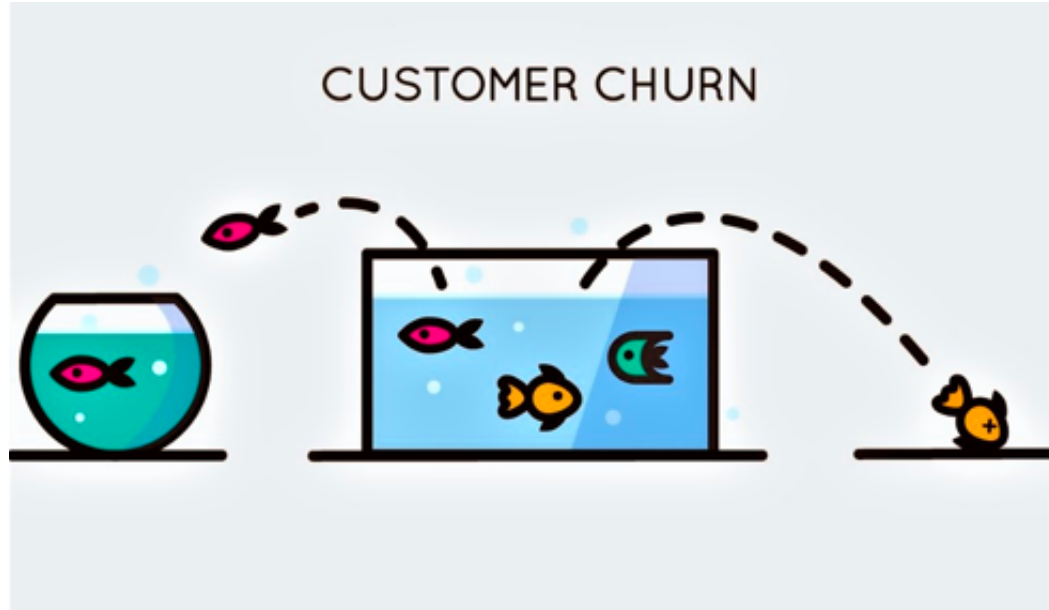

Hiring new people

We were so excited

Our first cool project

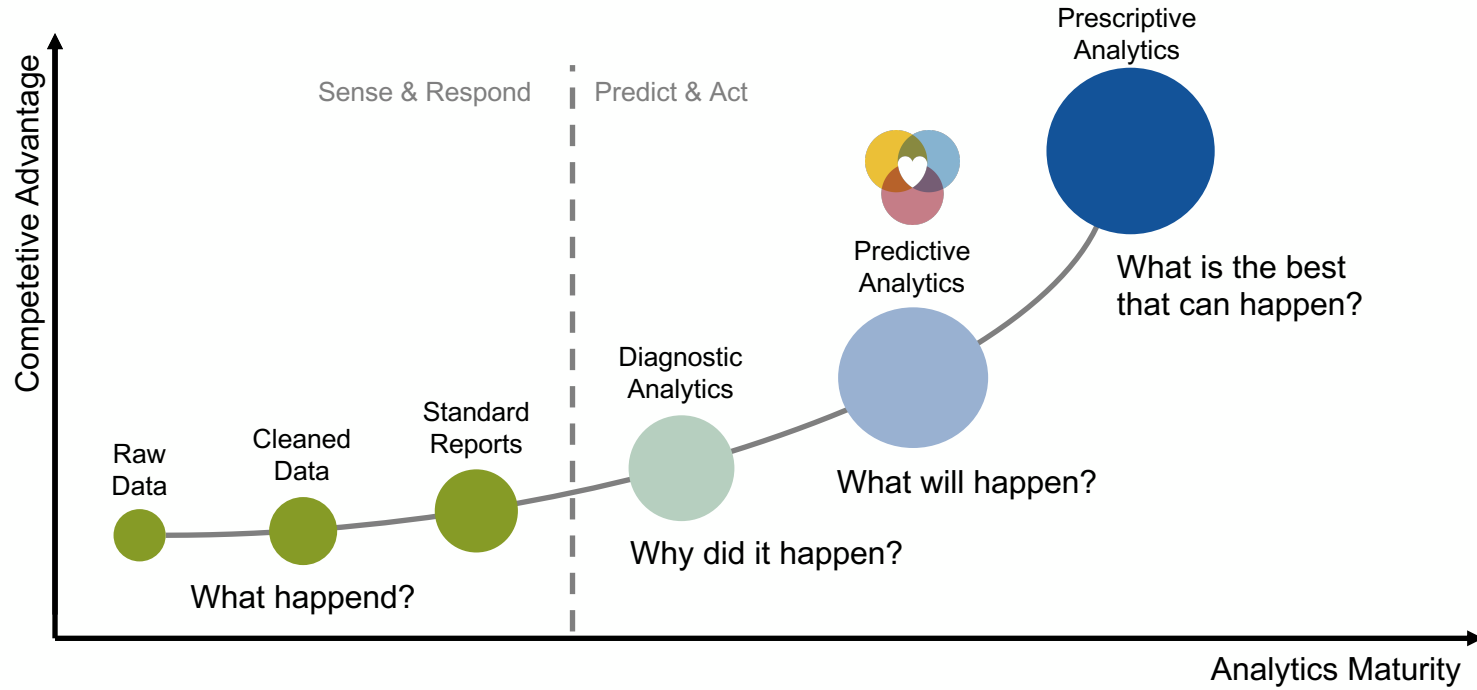

Problems we had

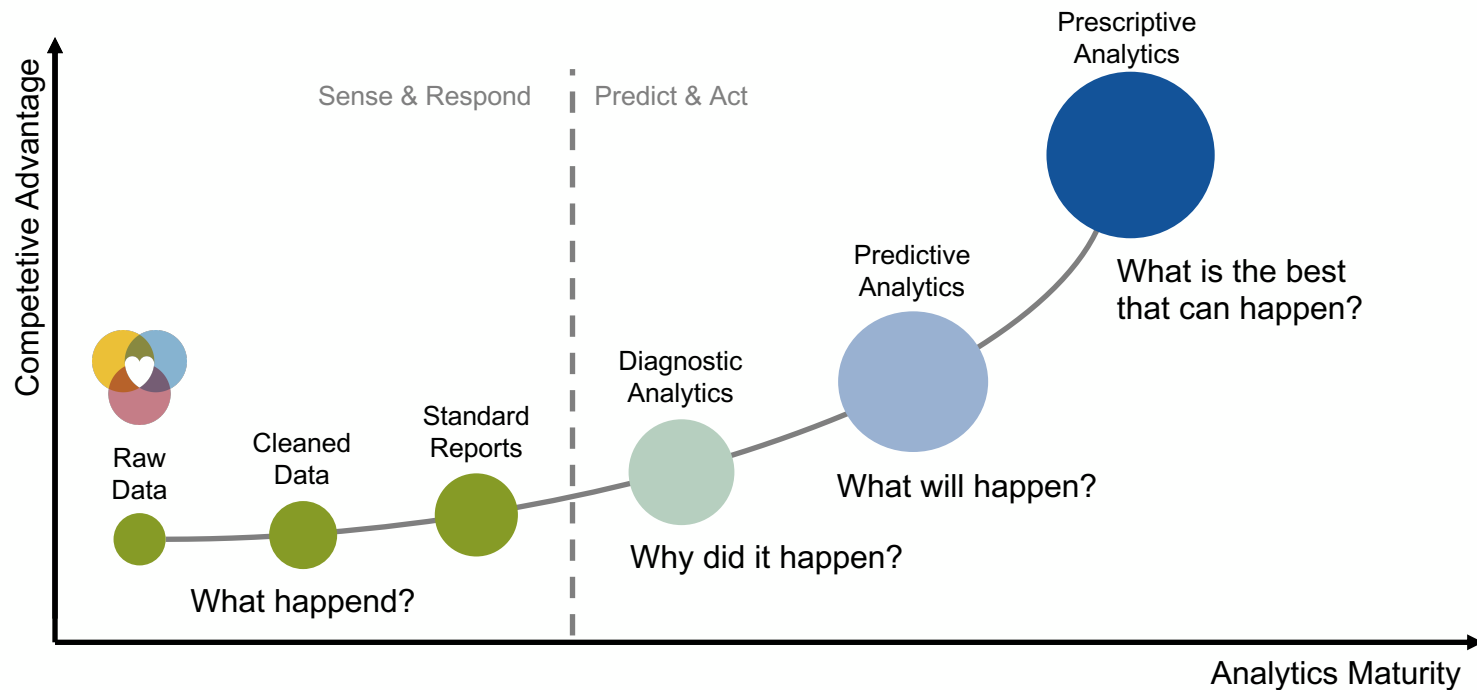

Quality of the
data was bad

Most of the data
was not historized

The basic problem

But reality was

Time to do our homework

Rebuild data infrastructure

Phase I

Build a complete
new Data Warehouse

Phase II

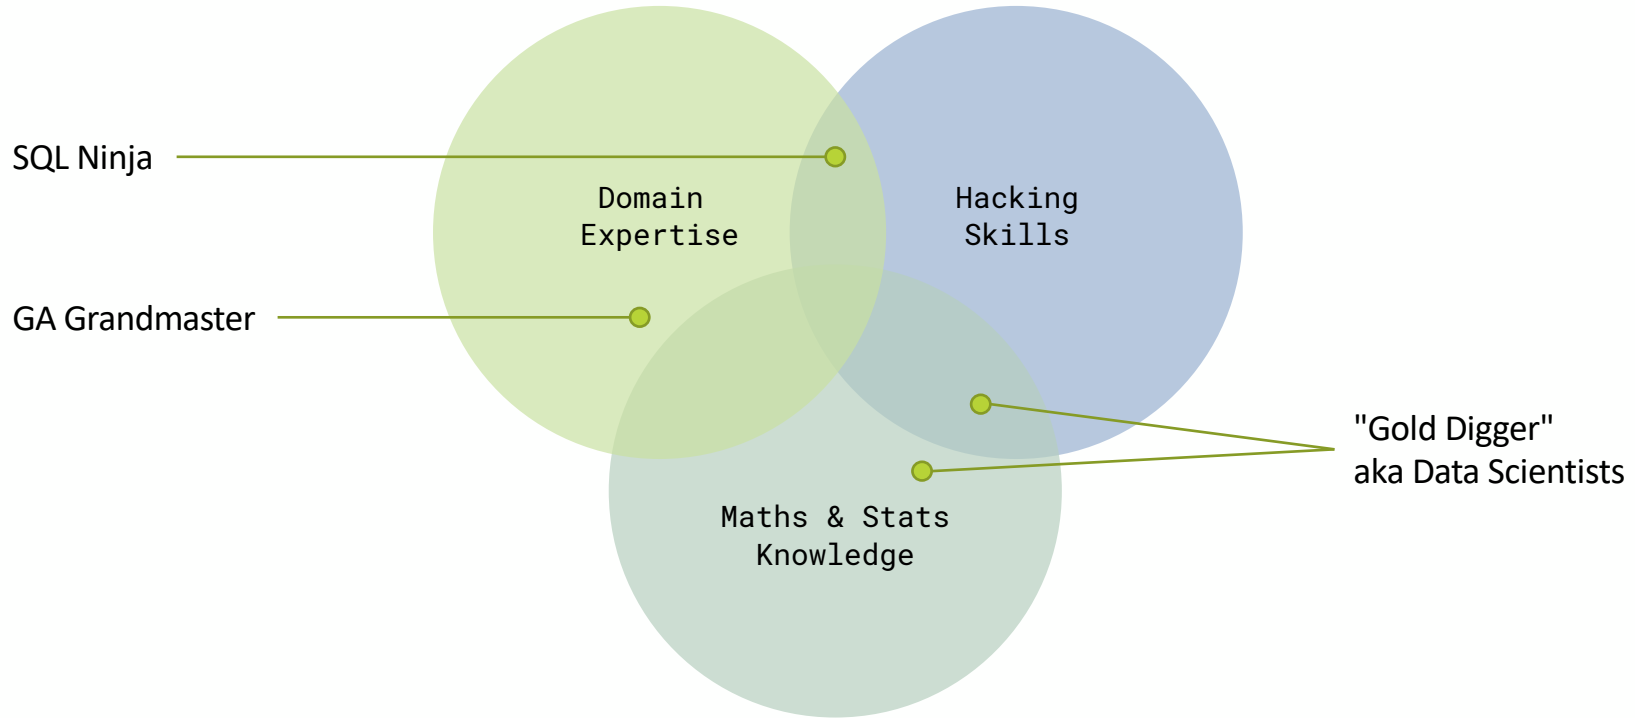

Historize all the data we
could potentially need

Phase III

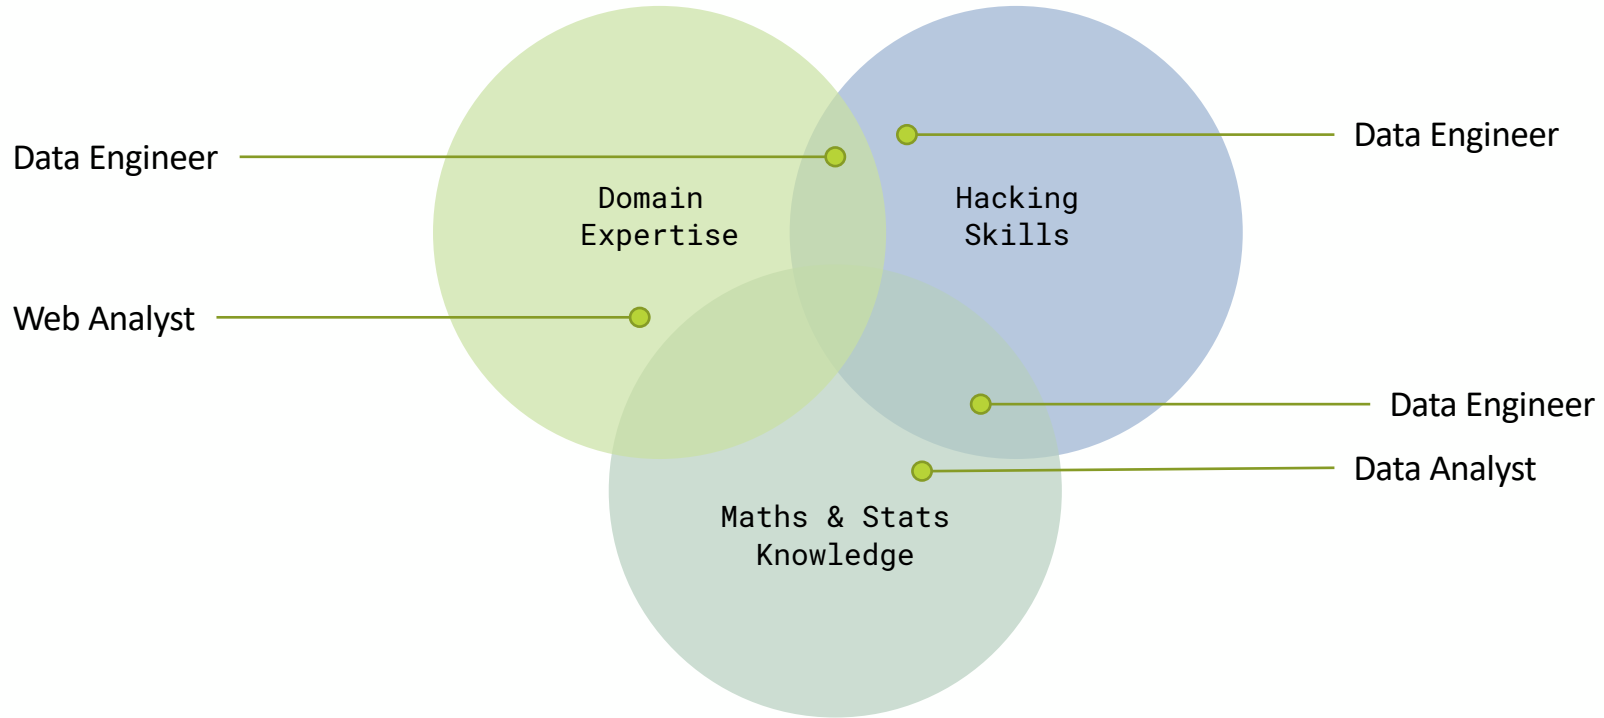

Use the data (and make
them available to others)

Rearrange the team

Rearrange the team

The new plan

Phase I

Build a complete
new Data Warehouse

Phase II

Historize all the data we
could potentially need

Phase III

Use the data (and make
them available to others)

Our stakeholders

THE END

Key lessons

Do your homework and
check where your data
infrastructure is right now

Choose a vision to give you
guidance on what you want
to do

Show people what you do
by first build vertical and
then scale horizontally

 Build a good Data Strategy **before** you hire a team to “dig for gold”!

What we cover today

- 1 A short story about gold
- 2 Data Strategy revisited

A Data Strategy is

a general plan how an organization is using its data assets.

Based on Marr (2017): Data Strategy

Its main components should be

an understanding of
your data maturity level

a vision of where
you want to go

a concrete roadmap of
how you get there

Based on Marr (2017): Data Strategy

Data Maturity Model

	Lagging	Beginner	Intermediate	Leading
1. Data Understanding	✗			
2. Data Storage	✗			
3. Data Processing	✗			
4. Data Provision	✗			
5. Data Governance	✗			
6. People	✗			
7. Organization		✗		
8. Leadership	✗			

Data Vision

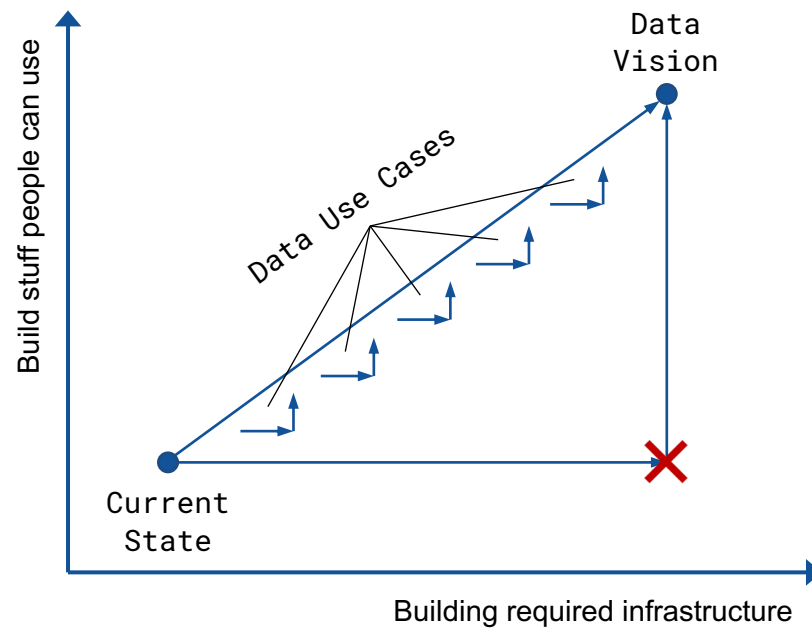

Example #1:

“Data is the core of the organization and it is utilized to inform every decision that is made.”

Example #2:

“Artificial intelligence is the core of our business by which we generate efficiencies and gain market advantage.”
